Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

● DIGITAL SKILLS

Microsoft Word | Microsoft Powerpoint | Instagram | Social Media | Skype | Zoom | Facebook | Microsoft Excel | Google Docs | Outlook | Google Drive | LinkedIn | Twitter | Internet user | Power Point | Good Command of C++, C# and C | Basic Command of HTML | Good Command of Unity

● MANAGEMENT AND LEADERSHIP SKILLS

Creative, Teamwork, Attention to Detail and Taking Charge

These are some of the skills that i acquired during my high school years, by playing video games. For example, playing competitive team -based games like league of legends and counter strike improved my creativity, as I always tried to come up with new ideas that will help us achieve victory. In these kind of games you also need to work with your team, because if you don't, the odds will not be in your favor. So in time, I was able to achieve team working abilities. Every aspect of a competitive game has it's small details and things that really count if you want to stand out from the crowd and become one of the best, so that is why I always try to pay close attention to details. In every team there should always be a leader, no matter the environment and situation. In video games, sometimes someone needs to step up in order to coordinate the team and lead them to victory. Usually when I am playing with my friends, i try to take charge and explain to everyone what we are going to do next in order to win. After 2 years of university, I was able to deepen these skills by working in intercultural teams and develop games.

● HOBBIES AND INTERESTS

Gaming

My favourite past time is playing online video games such as World of Warcraft, League of Legends, Counterstrike or Minecraft. I enjoy that I can play with my friends and I also find them very fun and enjoyable themselves. I like that games can create a community of like minded people. Also, I like the competitiveness of games, I like to win and better myself.

Driving

Driving is one of my recent hobbies, as it helps me relax and explore new places or experiences. No matter how long, crowded or the weather, I am always eager to go for a drive.

● COMMUNICATION AND INTERPERSONAL SKILLS

Multiculturalism, Friendliness, Imagination, Multilingual

Multiculturalism. In my Highschool, I had the opportunity to meet people from different countries and culture and I always made friends with them. I like to learn new things about people and see how different, yet how similar we are. I enjoy communicating with everyone, regardless of nationality, race or religion. I used to have classmates from China or Israel that I used to play video games with and we bonded over our common passion for shooting games. Friendliness, because since I was a small kid, I always tried to be friends with everyone no matter the age, personality or behavior. Imagination. I always came up with imaginary conversations with others inside my head and I always tried to solve them even if they weren't real. Multilingual. I am currently able to have a conversation in English, Romanian, Turkish and also Tatar. Moreover, I know a few words in German and French as well
